

PUNEET PATIL

Full-Stack Software Engineer | React • Angular • Java / Spring Boot • Node.js • Next.js • MySQL • MongoDB • REST APIs

Irving, TX ♦ (619)-707-7419 ♦ puneetpatil.w@gmail.com ♦ [LinkedIn](#) ♦ [GitHub](#) ♦ [My Portfolio](#)

SUMMARY

Full-Stack Software Engineer with 4+ years shipping production web applications across React, Angular, Spring Boot, and Node.js, including secure REST APIs (OAuth2, JWT, RBAC), event-driven microservices, and cloud-deployed (AWS) services. Experience spans owning live incident response and release management for a large-scale financial platform, designing fault-isolated service architectures, and mentoring engineering teams to raise code quality and delivery speed. Oracle Certified Java SE 8 Programmer with working knowledge of AI/GenAI systems, including LLM APIs and retrieval-based architectures.

TECHNICAL SKILLS

Languages and Data: Java 8, Python, JavaScript, TypeScript, MySQL, MongoDB, Hibernate ORM, JUnit, Mockito, Jest

Frontend: React, Angular, Next.js, Redux, HTML5, CSS3, Tailwind CSS, jQuery, Figma

Backend and Architecture: Spring Boot, Spring Security, Spring MVC, Microservices, Kafka, Node.js, Express.js, RabbitMQ, Salesforce

DevOps and Tooling: AWS (ECS), Linux, Docker, Kubernetes (OpenShift), Jenkins, Maven, Git/GitHub, Postman, Hasura GraphQL, Grafana

PROFESSIONAL EXPERIENCE

LTIMindtree - Citi Bank

Irving, USA

Production Support Engineer (Java, Kubernetes/OpenShift, CI/CD, MySQL, Oracle, Bash, UNIX)

Sep 2025 – Present

- Triaged and resolved live incidents on a mission-critical financial platform live across 56+ global sites, maintaining 99.9% uptime by isolating root causes before they reach end users.
- Scaled containerized workloads on AWS ECS and OpenShift pods based on load, right-sizing resource allocation and cutting infrastructure cost by 25%.
- Remediated production issues through shell scripts, SQL, and configuration fixes, contributing to a 20% gain in application throughput through performance tuning.
- Spearheaded 2 to 4 scheduled weekend release windows (RODs) per month, owning CI/CD pipeline validation and coordinating production rollouts across engineering teams.

Iris Software Inc. - Citi Bank

Tampa, USA

Full-Stack Software Developer (Angular, Figma, Java, Spring Boot, Spring Security)

Apr 2025 – Jun 2025

- Translated Angular frontend components from Figma wireframes and interactive prototypes, increasing usability testing satisfaction scores by 20%.
- Engineered Spring Boot backend services powering customizable dashboard column selection, reducing manual setup time by 40%.

San Diego State University

San Diego, USA

Web Developer (React, Spring Boot, Spring Security, MySQL)

Aug 2024 – Apr 2025

- Architected and deployed a scalable research platform using React, Spring Boot, and MySQL, boosting user retention by 30%.
- Hardened application security with Spring Security (OAuth2, JWT, RBAC), reducing security breaches by 85%.

Lavin Entrepreneurship Center, SDSU Research Foundation

San Diego, USA

Software Developer (React, Redux, Node.js, Express, MongoDB, Jest, Git)

May 2023 – May 2024

- Developed and scaled a high-performance web application using React and Redux, backed by Node.js and MongoDB, serving 5K+ daily users and boosting engagement by 40%.
- Delivered RESTful APIs with Node.js and Express handling 20K+ daily requests from that user base, improving response times by 30%.
- Mentored and led a team of 5 developers, implementing end to end testing with Jest that achieved 90% code coverage and cut bug reports by 35%.
- Integrated Salesforce lead generation with Apex automation, capturing 5,000+ new leads while improving data transfer accuracy.

GreetGood Retail

Ratnagiri, India

Full-Stack Software Engineer (React, Spring Boot, Junit, Mockito, Docker, Kafka, MySQL)

Jul 2021 – Jul 2022

- Constructed and tested Spring Boot REST APIs for order and payment workflows on a Kafka driven event architecture, boosting transaction efficiency by 90%.
- Optimized catalog and order tracking UI/UX using multithreading, caching, and query tuning, cutting load times from 10s to under 100ms.
- Designed service boundaries across order, payment, and inventory services so a failure in one wouldn't cascade to the others, supporting 500+ concurrent users with checkout response times under 150ms.

PROJECTS

E-Commerce Microservices Architecture (Angular, Spring Boot, Keycloak, Kafka, Docker)

- Implemented a microservices-based e-commerce platform with API Gateway routing, Kafka driven service communication, and secure authentication via Keycloak.

Secured Online Banking Application (Java, React, Spring Boot, Spring Security, JWT)

- Created a secure online banking application with a React frontend and a Spring Boot backend using Spring Security and JWT authentication.

EDUCATION

San Diego State University, USA

Aug 2022 – May 2024

M.S. Computer Science

CGPA: 3.81/4.0

Mumbai University, India

Aug 2017 – May 2021

B.E. Computer Engineering

CGPA: 9.09/10.0

CERTIFICATIONS

Oracle Certified Associate, Java SE 8 Programmer
